FAQs – Frequently Asked Questions

1. What is a Secure Payment Gateway?

A **Secure Payment Gateway** is a system that processes online payments while ensuring security, encryption, and fraud protection.

2. How does a payment gateway work?

When a customer makes a payment, the **gateway securely processes the transaction**, verifies details, and transfers funds to the merchant's account.

3. Can I integrate the payment gateway into my website or mobile app?

Yes! Our **payment gateway supports API integration** for seamless transactions across multiple platforms.

4. What payment methods does your gateway support?

Our payment gateway supports credit/debit cards, UPI, net banking, mobile wallets, and more.

5. Is your payment gateway secure?

Absolutely! Our gateway employs encryption, fraud detection, and compliance measures for secure transactions.

Why Choose PeUnique as Your Payment Gateway Provider?
